APPLICANT:

C. T. Caskey, et al §

Docket No.: D-5050

SERIAL NO .:

256,689

FILED:

October 12, 1988

INVENTION:

Multiplex Genomic DNA Amplification for Deletion Detection

Group Art Unit 187
I hereby certify that this correspondence is being that the United States Postal Service as Examiner than mail in an envelope addressed to Commis-A. MarschelPatents and Trademarks, Washington, D. C.

HONORABLE COMMISSIONER OF PATENTS & TRADEMARKS Washington, D. C. 20231

Name of applicant, assistance, or Registered, Nepresentative

RESPONSE UNDER 37 C.F.R. SS 1.111

Dear Sir:

AMENDMENT

Responsive to the Office Action dated January 29, 1990 kindly amend the following claims: In the Claims:

I (amended). A method for simultaneously detecting known deletions [at a plurality of] from at least three ONA sequences, comprising the steps of:

> treating said DNA to form single-stranded complementary strands;

adding [a plurality of] at least three paired oligonucleotide primers, each pair specific for a different sequence, one primer of each pair substantially complementary to a part of the sequence in the sense-strand and the other primer of each pair substantially complementary to a different part of the same sequence in the complementary anti-sense strand;

annealing the [plurality] at least three pairs of primers to their complementary sequences;

simu/taneously extending said [plurality of] at least three pairs of annealed primers from each primer's 3' terminus to synthesize an extension product complementary to the strands annealed to each
